

Start with a fish base.

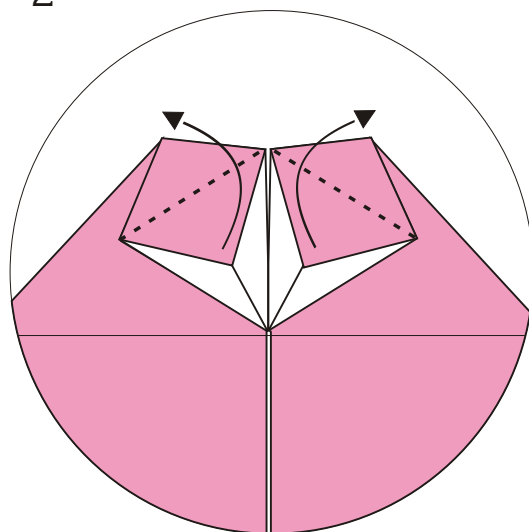

Use two colored origami paper of 15x15 cm.

Squash fold the peaks of the fish base as shown in the first diagram. The top of the peak will meet the valley line.

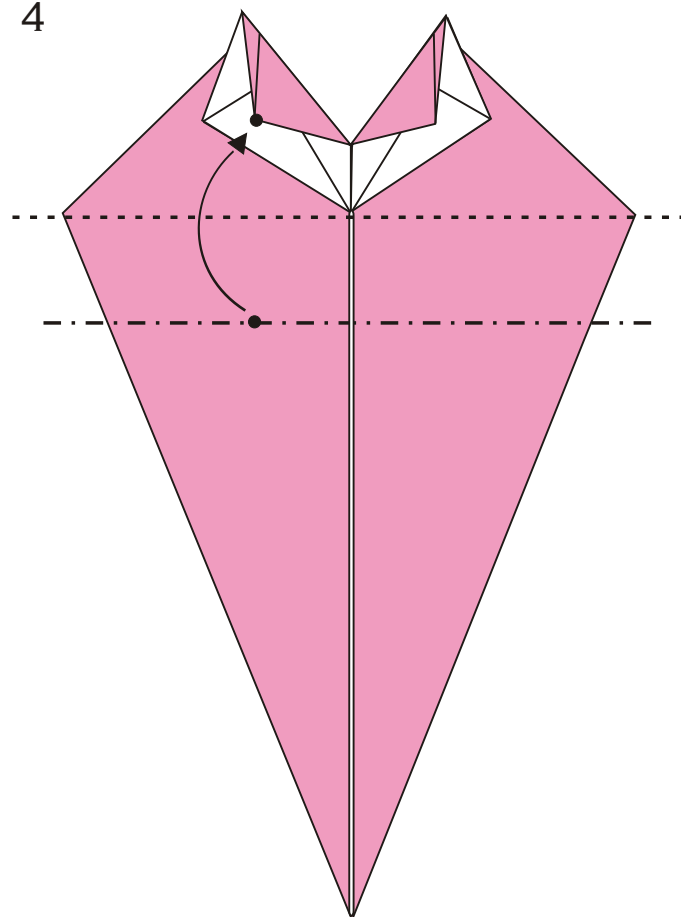

Valley fold to form the ears.

2

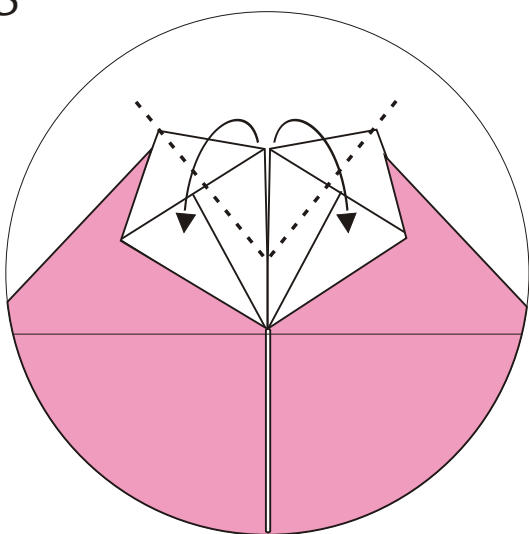

Valley fold up and then valley fold the upper layer of the bird base down again (pleat). The edge should cover the marked corner.

4

Narrow the ears by valley folding once more.

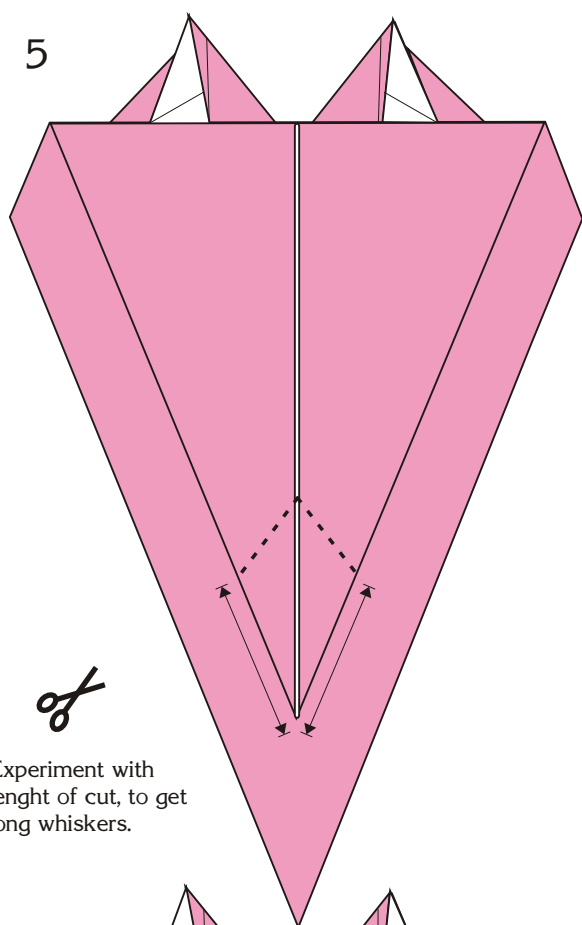

3

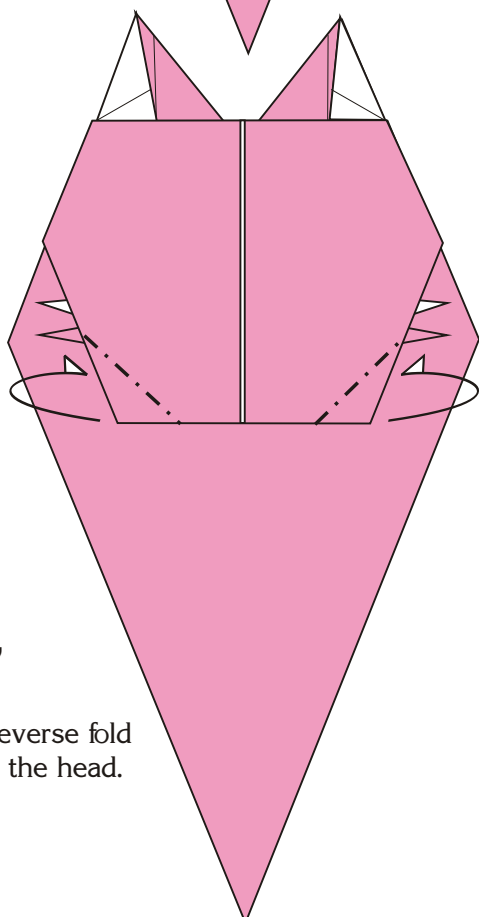

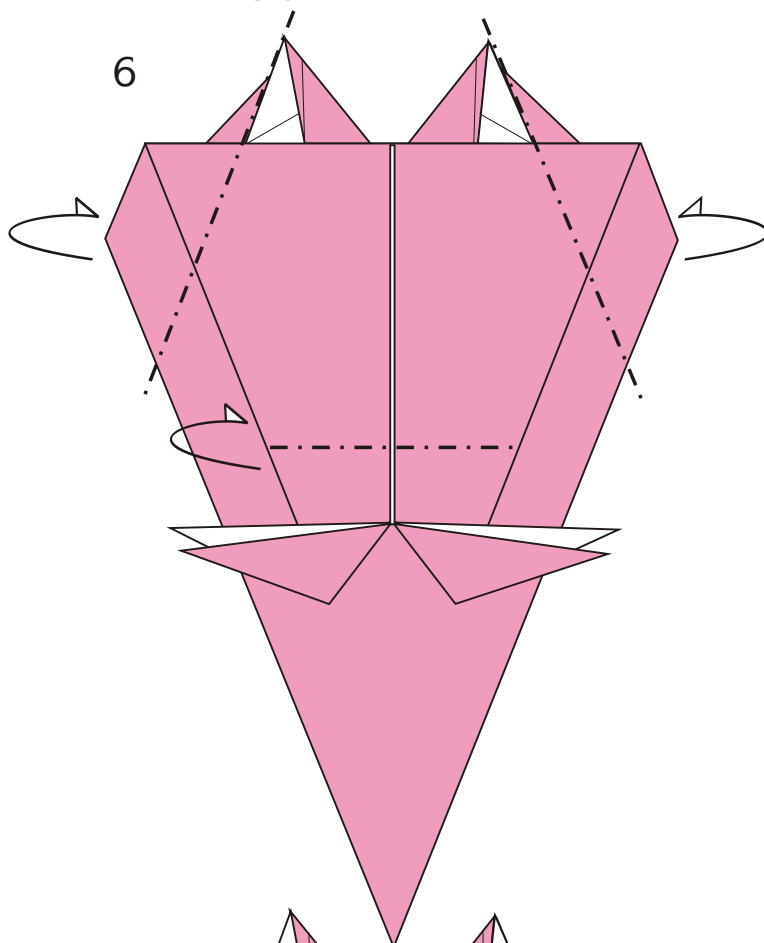

Cutting is required to obtain the following whiskers.
If you are a purist, simply skip this step.

Cut in the middle and once on each side of
the upper layer to separate the whiskers.
Then valley fold them up to the left and right side.

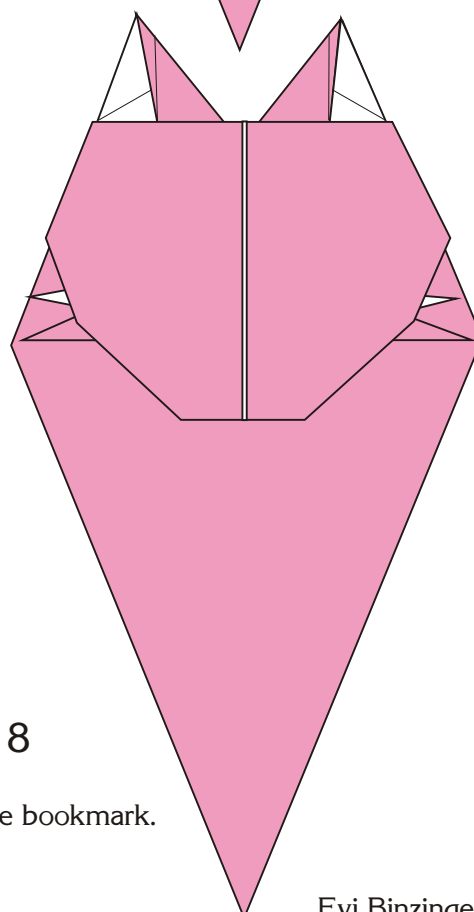

Now mountain fold behind the lower part of first layer
and reduce width of head by mountain folding behind
the left over paper of the sides.

Experiment with
length of cut, to get
long whiskers.

Inside reverse fold
to form the head.

Complete bookmark.
